FALL ENVST CONSERVATION INTERNSHIP

Summit Land Conservancy is a land trust in Park City, which works to permanently protect the open spaces in Summit County. The Conservancy has protected over 2600 acres and needs your help to protect more!

We have an opportunity for an individual to work with a nationally accredited land trust, while gaining knowledge about land conservation, exploring Summit County open spaces, and working with a unique blend of young, fun, enthusiastic environmental individuals.

**Responsibilities**

Baseline Research

- If you like hiking, making observations and the great outdoors, then baseline documentation is the job for you! A baseline is a snapshot of a property at that point in time and must be done for each new property we conserve. This work will involve research, mapping, and fieldwork.

Conservation Plan Assistance

- Do you enjoy research? As we develop our conservation plan, we need an intern to gather data from government agencies, assimilate the information, and develop maps that show areas of high conservation values.

**Other Responsibilities:**

- Administrative duties
- Digitizing Landowner Contacts
- Assisting with Youth Programs

**Other Opportunities:**

Is there something specific you want to learn or do? Let us know, and during your time with us we will attempt to make this happen.

**GIS—if you are a GIS individual we have the opportunity to add to your professional portfolio through conservation mapping.**

Please send resume, interest letter, and inquiries to caitlin@wesaveland.org
