Degrees
B.A./B.S. in Environmental and Sustainability Studies
Minor in Environmental and Sustainability Studies

ENVST Program
Environmental and Sustainability Studies students develop an understanding of ecological systems and the consequences of human-environment interactions, with grounding in earth systems and social science. The curriculum emphasizes human impacts on the environment, policy and decision making, ethics, and historical approaches to the human-environment relationship. This interdisciplinary program is unique in its emphasis on peer learning and community engagement regarding the environment, social responsibility, and sustainability.

A Diverse Major
The interdisciplinary approach provides many opportunities that lead to careers or graduate school in the social sciences, urban planning, public administration, business, science, or law. Consider a double major in a complementary field to further your knowledge. Take advantage of access to a variety of faculty to tailor your own college experience. Be sure to consult with an advisor in the complementary program in order to plan appropriately.

Scholarships
The Environmental and Sustainability Studies Program provides the Eugene Andreaeson scholarship, 2 tuition waivers, the Alta Scholarship, and the Brandon Lee Scholarship. Information for these can be found on our website www.envst.utah.edu, hovering over the “Students” tab and selecting “Scholarships”.

Special Opportunities
Consider arranging independent research for credit, internships or Study Abroad in Costa Rica. These opportunities, plus service learning courses, allow for close collaboration with faculty, fellow students, and community partners. The Environmental and Sustainability Studies Program offers Study Abroad in Costa Rica for six upper division credits, every summer.

Requirements for the Major
- Unrestricted upon entry
- Maintenance of a 2.25 (or higher) cumulative GPA
- Minimum C- in all courses contributing to the major
- Completion of 47 semester credits for degree award
- Prerequisite completion as specified by respective departments
- Residency Requirement in the Major: 25 hours, 20 of those in the final two years
- Allied Hours: None required

Course Requirements

**Study Abroad in Costa Rica**
Environmental and Sustainability Studies offers summer Study Abroad in Costa Rica. The experience lasts 3-4 weeks, provides students with six upper-division credits, and satisfies the University International Requirement (IR). Courses change each year, are taught by University of Utah faculty, and apply to specific requirements in the major. Contact the Study Abroad Office for more information.
