**JOB POSTING - ENVIRONMENTAL TECHNICIAN**

Small Salt Lake City area environmental consulting firm is seeking a part-time staff technician to assist with consultation projects and support waste room duties. This is a great opportunity to obtain diverse experience with industrial hygiene and environmental consulting projects. Position will pay $20+/hour, depending on education and experience. Includes vacation, health, dental, and 401(k) benefits.

**Description of Duties Upon Initial Hire**

The following provides a description of initial duties/assignments. There will be opportunity for growth, particularly for candidates pursuing degrees in environmental-related fields of study:

**Environmental Technician Duties ~60%**
- Calibrate and maintain environmental equipment
- Assist drilling services to support drilling operations for shallow soil and groundwater screening, testing and sampling including but not limited to groundwater monitoring well installation, soil gas and well point construction and installation
- Hazardous waste handling duties at client facilities
- Air, soil, and water monitoring with supervision at public and private sector industrial, commercial, and governmental sites, including:
  - Petroleum & Gas
  - Pharmaceutical
  - Construction
  - Manufacturing
- Assist with environmental reporting for client facilities
- Computer data entry duties, data management and field and project deliverables support
- Other duties as assigned

**Office and administrative tasks ~20-40%**
- Answering and directing client phone calls
- Filing and document control
- Assist with office administrative duties as needed
- Routine and weekly timesheet and expense documentation and submittal

**Qualifications**
- Must have strong written and verbal communication skills
- Must be able to work well with clients and co-workers
- Good computer (Excel, Microsoft Word) and data entry skills
- Preferred Baccalaureate Degree with science background, such as Industrial Hygiene, Public Health, Environmental Science, Chemistry, or Biology. Bachelor of Science degrees are preferred.
- Applicants must possess a current driver’s license and reliable automobile transportation
The job requires that applicants are able to perform work assessments in industrial and/or construction locations. This may require carrying equipment and/or tooling, miscellaneous consumables/project supplies exceeding 30 pounds, climbing stairs and ladders, standing for long periods of time, or performing other physical labor related to assigned tasks.

- Occasional travel, including overnight stays, is required.
- Must be able to pass drug and background check screening.
