BLM Wildlife Internship

Start date: February 2018

Internship overview: The overall goal of this internship is to assist the Bureau of Land Management (BLM) Salt Lake Field Office (SLFO) wildlife biologist with an inventory of developed waters across the BLM’s West Desert lands. The majority of the work required will be office based and includes review of environmental documents, database development and entry (Access, ArcGIS), data management, and data analysis. There will be opportunity to conduct field work within the scope of this particular project, in addition to participating in other wildlife related projects occurring during the internship. The intern will gain experience within a wildlife program for a federal land management agency.

Qualifications: Applicants must currently be enrolled in an undergraduate degree related to Natural Resources, Wildlife Biology, Environmental Studies, or other related discipline appropriate to the position.

To apply: Please submit a resume and brief cover letter in one PDF document to ejencso@blm.gov by January 10, 2018. Please address the following items in your cover letter: 1) why you are interested in this particular internship, 2) what your career or educational goals are, and 3) experience with Microsoft Office, ArcGIS, and conducting field work or outdoor experience. I am looking for determined, competent individuals with the desire to further develop and expand on their skill sets, and who are looking for experience working with a land management agency. The successful candidate will be notified by January 15, 2018.
