Internships Available
The Utah Rivers Council has a Water Policy & Research Internship position available for Summer Semester 2019.

Organizational Background
The Utah Rivers Council works to protect Utah's rivers and clean water sources for citizens and wildlife. The URC has had many successes in protecting Utah's rivers and promoting water conservation throughout the years, including authoring the Water Conservation Plan Act, Utah's first water conservation law.

Water Policy & Research Intern
The Water Policy & Research Intern will assist in activities and tasks that promote the URC’s programs with state and federal agencies and through local governments in an effort to protect Utah’s precious rivers. Responsibilities of the intern include researching water conservation efforts across the West; researching water rates and pricing policies in and around Utah; and researching proposed water projects, including the $3.2 billion Lake Powell Pipeline and $2.5 billion Bear River Development. 2019 is a critical year for Utah’s rivers since both of these proposed projects are advancing into their permitting phases. The Intern may also be asked to help represent the URC at public events and outreach opportunities from time to time.

This is an excellent opportunity for a student seeking an education on the basics of water supply, western water politics, and sustainability issues in the water sector. This internship is also an introduction into the world of non-profit environmental work and an opportunity to network with professionals in the environmental field. The student will gain insight into a career with an environmental organization and gain real world experience in grassroots advocacy. Several of the URC’s past interns have gone on to become staff members for the organization.

Skills Needed
Course work related to environmental sustainability, western water policy, economics and general civics knowledge. Preferred candidates will have attention to detail, independent research skills, excellent organization skills, strong computer skills, comfort with multi-tasking, effective writing and public speaking skills, and an interest in protecting the rivers of Utah!

Hours Available
9-15 hours a week are available; unpaid but class credit is possible. Scheduling of hours will be regular, but we are flexible according to class schedules and workload.

To apply
Send a cover letter explaining your interests and background, resume, and a short (1 to 2 page) writing sample to: Nick Schou at nick@utahrivers.org. You may also be asked to provide one to two references after you apply.
