

Water Policy and Outreach Internship Fall Semester 2018

Internships Available

The Utah Rivers Council has a Water Policy and Outreach Internship position available for Fall Semester 2018.

Organizational Background

The Utah Rivers Council works to protect Utah's rivers and clean water sources for citizens and wildlife. The URC has had many successes in protecting Utah's rivers and promoting water conservation throughout the years, including authoring the Water Conservation Plan Act, Utah's first water conservation law.

Water Policy & Research Intern

The Water Policy and Outreach Intern will assist in activities and tasks that promote the URC's programs with state and federal agencies and through local governments in an effort to protect Utah's precious rivers. Responsibilities of the intern include researching water conservation efforts across the West; conducting outreach to build new partnerships for our RainHarvest program; and researching various aspects of proposed water projects, including the \$3 billion Lake Powell Pipeline and \$2.5 billion Bear River Development. 2018 is a critical time for Utah's rivers since both of these proposed projects are advancing into their permitting phases. The Intern may be asked to help represent the URC at public events and outreach opportunities from time to time.

This is an excellent opportunity for a student seeking an education on the basics of water supply, western water politics, and sustainability issues in the water sector. This internship is also an introduction into the world of non-profit environmental work and an opportunity to network with professionals in the environmental field. The student will gain insight into a career with an environmental organization and gain real world experience in grassroots advocacy. Several of the URC's past interns have gone on to become staff members for the organization.

Skills Needed

Course work related to western water policy, general civics knowledge, attention to detail, independent research skills, excellent organization skills, strong computer skills, comfort with multi-tasking, effective writing and public speaking skills, and an interest in protecting the rivers of Utah!

Hours Available

9-15 hours a week are available; unpaid but class credit is possible. Scheduling of hours will be regular, but we are flexible according to class schedules and workload.

To apply

Send a cover letter explaining your interests and background, resume, and a short (1 to 2 page) writing sample to: Taylor Graham, taylor@utahrivers.org. You may also be asked to provide one to two references after you apply.
